

Hello,

We are a local team of high schoolers who train and compete in a nationwide robotics competition. The competition, FIRST Robotics competition is a competition which is run internationally by FIRST. The Varsity Sport for the Mind™, FRC combines the excitement of sport with the rigors of science and technology. Under strict rules, limited resources, and time limits, teams of 25 students or more are challenged to raise funds, design a team "brand," hone teamwork skills, and build and program robots to perform prescribed tasks against a field of competitors. It's as close to "real-world engineering" as a student can get. Volunteer professional mentors lend their time and talents to guide each team. As a result of FRC, students receive an education that will last them a lifetime.

We attended the Greater DC regional last season. At that meet, we placed 7th out of 40 teams even though we were a rookie team. Our extraordinary performance led us to be team captain and to advance to the playoffs. We received the Highest Rookie Seed award and the Rookie All-Star award leading us to be invited to the World Championships in St. Louis, MO.

This season, we hope to surpass what we have achieved last year. One of our biggest constraints right now is funding. Our budget this year is \$10,000. To date, we have received funding of \$2500 from various corporations and club dues. Without raising an additional \$2500 by November 15th, we will not be able to compete in FRC. Please support us by either providing funding or mentorship to the team. We highly appreciate your help with this endeavor.

Thanks,
FRC Team 5549
